Princess Alexandria Victoria of Kent was born in the summer of 1819 as the granddaughter of William III. Although the likeliness of Victoria ascending to the throne should have been slim, her birth was actually part of a great race to secure the Throne and Kingdom.

Victoria's early years were not easy or happy; everything was under strict and precise control. Including her diet!

Everything changed after Victoria's uncle died when she was 18 years old, and she became queen. Victoria now felt a newfound freedom to eat and drink and be merry. And she did with great gusto, and grand parties abounded!

During her exceptionally long reign, Victoria oversaw a cultural and culinary revolution that endures to this day. As a result, many of our food traditions are rooted in the Victorian era.

Although her beloved Albert's death may have halted the parties, Victoria's love of food did not abate. It was common for Victoria to consume a full-cooked breakfast every morning and an entire roasted ox during Christmas celebrations, It was common knowledge that Victoria ate at such speed that follow guests could not compete.

Thus, the moniker of The Greedy Queen was born

WITH VICTORIA'S LEGACY IN MIND

EAT DRINK AND MAKE MERRY!
